

PALLISIDE

the **smart choice** in weatherboards

new colours available

strengths of palliside[®] weatherboards

NEVER NEEDS PAINTING

Palliside[®] weatherboards never need painting, not now, not even in 25 years.

MADE IN NEW ZEALAND

These weatherboards are made here in New Zealand, specifically for New Zealand conditions.

COST EFFECTIVE

These weatherboards are very cost effective, right from the start.

25 YEAR GUARANTEE

Palliside[®] is covered by a 25 year manufacturers' guarantee.

INDEPENDENTLY TESTED

The Palliside[®] system has been independently tested to ensure that our weatherboards will stand the test of time.

SUSTAINABLE

Palliside[®] is a sustainable weatherboard system manufactured from 100% recyclable material.

the smart choice

Selecting the exterior cladding of your home is a very important decision. You carefully consider qualities like weathertightness, looks, style and setting. But don't overlook your lifestyle. Palliside® Weatherboards offer a stylish cladding option that also lets you enjoy your leisure time as these cost effective weatherboards never need painting.

Combining the natural shadow-lines and definition of timber weatherboards with modern, low maintenance materials, Palliside® Weatherboards provide a solid, smart looking cladding that complements a wide variety of housing styles and will keep on looking good for years to come.

choice of shape

The distinctive proprietary shapes exclusive to Palliside® in Rusticated and Traditional styles are available in a number of colours. Rusticated is also available in both a smooth and a woodgrain finish. Traditional, which when installed emulates the style of bevelback weatherboards found on many New Zealand homes, is available in a smooth finish only.

Colours available: White · Calico · Tea · Riverstone · Sandstone* · Slate*

Traditional Shape

Rusticated Smooth Shape

Rusticated Woodgrain Shape

*Initial launch available in Traditional shape only.

benefits

Pallside's colour is not just on the surface... as part of the manufacturing process it's right through the thickness of the weatherboard ensuring maintenance is minimal. An occasional wash down keeps it looking just like new, leaving you time to enjoy your life!

By eliminating the need for painting and minimising maintenance Pallside® ensures you save money now and in the future. Pallside® Weatherboards are double profiled, ensuring that they are quick to install – effectively cutting the installation time in half and reducing the cost of installing Pallside®.

Pallside® Weatherboards are manufactured in New Zealand. They've been designed and tested here to ensure they provide excellent protection from the damaging effects of our harsh climate.

They're impervious to moisture so they won't rot or break down while the anti-capillary groove and interlocking nature of the Pallside® design helps prevent moisture from getting in behind the weatherboards.

The entire Pallside® Weatherboard system has been independently tested to ensure that the product complies with the New Zealand building regulations. The extensive testing at BRANZ gives the homeowner confidence that they are getting a quality product that will last.

The Pallside® system comes with a full range of accessories to ensure an attractive finish. These include moulded corners and finishing plugs that provide a smooth surface. 80mm round coloured downpipes are also available to match the colour of the weatherboards.

Pallside® Weatherboards are covered by a 25 Year manufacturers' guarantee. From exposed coastal regions to the temperature extremes of the southern heartland and the tropical temperatures of Pacific locations, Pallside® is being used successfully on a range of housing projects.

applications

The versatility of Pallside® weatherboards ensures that the product can be used on a wide range of projects from suburban palaces to coastal batches. The stylish good looks and choice of shape and finish mean that Pallside® is an attractive weatherboard option for villas and family homes.

Pallside® weatherboards are ideal for rejuvenating the exterior appearance of an existing home. Pallside® offers an up-market presentation and eliminates the need for ongoing home maintenance.

Pallside® has been used on a number of large projects including full sub divisions, sports complexes, hotels, retirement homes, shopping centres and schools.

flexible cladding

Palliside® is often used in conjunction with other claddings, particularly brick, and provides all the appeal of traditional weatherboards, without the maintenance.

Palliside® can be curved around walls and balconies as long as the radius is no less than three metres. The rusticated shape can be installed vertically if desired.

Palliside® is fixed from the base of the wall up and is nailed much like conventional weatherboards. The long Palliside® lengths reduce the need for joints. As a complete system, there is a wide range of accessories available that further enhance the attractive finish of the weatherboards.

security

With two active BRANZ Appraisals, Palliside® complies with the requirements of the New Zealand Building Code as an alternative solution.

More information on Palliside® and the Building Code can be found in the Palliside® Technical Guide.

technical information

Palliside® is manufactured from specially formulated uPVC. The foamed cellular core coupled with the top coat form a lightweight yet durable cladding.

Palliside's top coat is not only resistant to denting and chipping but is UV resistant also - protecting your home from the high UV levels of New Zealand's harsh sunlight.

Palliside® weatherboards are available in a standard 5.8 metre length. The effective cover of the weatherboards is 260mm (nominal) giving a total cover of 1.5m² per weatherboard.

environmental awareness

Dynex Extrusions Ltd is a New Zealand company with over 30 years manufacturing experience, Dynex is committed to environmentally sound production and believes in the importance of sustainable manufacturing.

The commitment to reducing the company's impact on the environment is demonstrated by adhering to the ISO 14001 environmental standard.

Palliside® is a sustainable weatherboard system manufactured from 100% recyclable material. For more information on Palliside's sustainability credentials visit the Palliside® website where you will find the full environmental statement:
